Precipitation probability							
00%	<05%	10%	50%	90%	80%	40%	30%

Forecast for Wednesday 29 Dec 2021

Weather: Dry overnight with cloud gradually thickening and lowering from the south. Broad area of rain, initially falling as snow above 800m, soon spreading from southwest during the morning, reaching all before noon. The rain will gradually weaken and clear from the south through the late afternoon and evening, with a brisk, showery west to southwest flow becoming established by mid-night.

Chance of cloud free mountain/hill tops above 800m: 70% becoming 10-20% late morning, before improving in the clearance 30% in west and 60% in east.

Visibility: Becoming moderate or poor in rain, very poor in snow and hill fog, with bases quite extensive above around 500-700m on the front, also to a lesser extent later in the west in the cloudy southwesterly flow.

Met Office Aberdeen Meteorologist's View

Very difficult conditions in frontal weather with extensive hill fog and summit gales which brings a severe wind chill.

Forecast for Thursday 30 Dec 2021

Weather: Rather cloudy start with frequent showers, turning heavy at times, particularly in the west, also sporadically wintry across higher peaks. Gradually becoming drier and brighter from late morning as a ridge of high pressure builds from the south. Periods of rain extending from the south late evening and overnight.

Maximum wind: Southwest beginning mean 35mph with gusts reaching 50mph around most exposed ridges and summits, gradually easing from mid-morning.

Chance of cloud free mountain/hill tops above 800m: Initially 25% in west and 50% in east, becoming near 100% by mid-day, then 20% or less overnight.

Visibility: Becoming moderate or poor in rain or showers, very poor in snow and hill fog, with bases frequently lowering 500-700m in early showers, and more widespread in later rain.

Temperature: **Glens:** Plus 2 Celsius increasing 10 Celsius for afternoon
At 800m: Plus 3 Celsius
Freezing level: Around 1400m
